### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 04 March 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 15, 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Jewell (US 419,606 cited by applicant).

Jewell discloses a screen system for underground wells, the screen system comprising a screen C wherein the screen comprises a plurality of slots g; and a mechanism I capable of varying the size of the said slots. With respect to the depending claim(s), the reference teaches the limitations as claimed. See the entire document, especially Figs. 1-2 and claims. With respect to claims 15+, the reference teaches the associated method as claimed.

3. Claims 1, 2, and 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Beck (US 2,280,054 cited by applicant).

Beck discloses a screen system for underground wells, the screen system comprising a screen 2 wherein the screen comprises a plurality of slots 3, and a mechanism 5 capable of varying the size of the said slots. With respect to the depending claim(s), the reference teaches the limitations as claimed. See the entire document, especially Figs. 1-2 and col. 2 (left), line 49 - col. 2 (right), line 2. With respect to claims 15+, the reference teaches the associated method as claimed.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claim 3, 13, 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jewell or Beck in view of Uban et al. (US 5,979,551 cited by applicant).

Jewell and Beck disclose screens as stated above. However, the references fail to teach a perforated shroud as called for in the claims.

Uban et al. teaches a well screen having a perforated shroud 30 for the purpose of protecting the screen surface underneath.

Art Unit: 3676

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided a shroud in view of Uban et al. in order to protect the screens downhole.

***Allowable Subject Matter***

7. Claims 4-12 and 18-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Echols et al. teaches a screen having an inlet control device.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zakiya W. Bates whose telephone number is (571) 272-7039. The examiner can normally be reached on Monday-Friday, 8:30 AM-5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jennifer Gay can be reached on (571) 272-7029. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
